

# CIA LASER INSPECTION SENSOR PACKAGE

***SAME REPEATABLE AND RELIABLE SERVICE BUT WITH A NEW AND IMPROVED DESIGN!!!!***

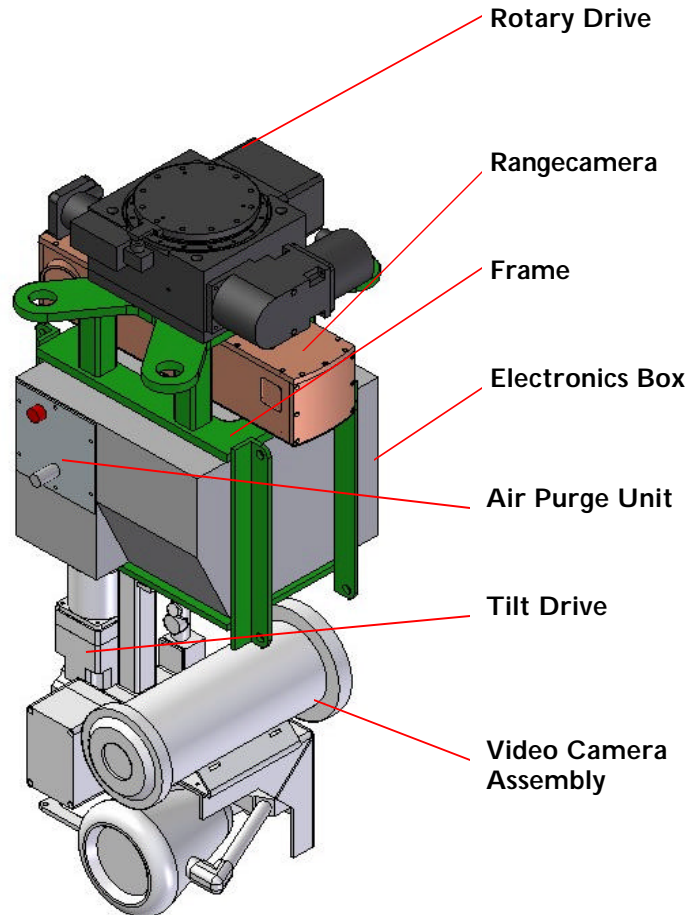

CIA Inspection will soon be launching its new coke drum laser and video inspection sensor package.

With the ever changing bottom unheading devices, CIA wanted to make sure it could perform its service on all our existing and new customers with any kind of bottom unheading device.

We also designed our new system to fit in a 28" top enclosure so that future top head designs could also accommodate our equipment.

#### **Key Features:**

- Facilitates both top and bottom entry without breaking the plane of the flange.
- More robust and modular design exceeds Class I Division II requirements for use in explosive environments.
- Can be inserted into a 28" diameter nozzle.
- Reduces time to install and perform the inspection.
- Tilt feature on the camera allows for a more complete video inspection.

**FOR MORE INFORMATION ABOUT CIA'S SERVICE AND OUR NEW INSPECTION UNIT,  
PLEASE CONTACT RICK CLARK @ 905-692-3678 OR JACQUELINE CAMERON @ 905-578-3287**
